(19) World Intellectual Property Organization
International Bureau

(43) International Publication Date
29 March 2001 (29.03.2001)

PCT

(10) International Publication Number
WO 01/21760 A3

(51) International Patent Classification⁷: C12M 3/00, 3/04

(74) Agent: VAN AMSTERDAM, John, R.; Wolf, Greenfield & Sacks, P.C., 600 Atlantic Avenue, Boston, MA 02210 (US).

(21) International Application Number: PCT/US00/26122

(22) International Filing Date:
22 September 2000 (22.09.2000)

(81) Designated States (*national*): AU, CA, CN, JP, US.

(25) Filing Language: English

(84) Designated States (*regional*): European patent (AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE).

(26) Publication Language: English

(30) Priority Data:
09/405,477 24 September 1999 (24.09.1999) US

Published:

- With international search report.
- Before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments.

(71) Applicant (*for all designated States except US*): CELL SCIENCE THERAPEUTICS [US/US]; 50 Cummings Park, Woburn, MA 01801 (US).

(88) Date of publication of the international search report:
10 May 2001

(72) Inventors; and

(75) Inventors/Applicants (*for US only*): UPTON, Todd, M. [US/US]; 50 Hackensack Road, Chestnut Hill, MA 02467 (US). FLICKINGER, John [US/US]; 305 Ginger Road, Millville, NJ 08332 (US).

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: CELL CULTURE SPINNER FLASKS

(57) Abstract: The present invention relates to culturing devices that are compact, utilize small amounts of cell culture media to establish and maintain cell cultures, and produce a large number of cells in a short period of time when compared to other cell culturing devices and techniques. Such devices are useful in the culture of all cell types, but are particularly useful in the culture of cells that are known in the art to be difficult to culture, including cells that lose one or more of their particular attributes/characteristics (e.g., pluripotentiality), or cells that are difficult to establish cultures of (e.g. primary cells), during culturing in traditional cell culture devices.
